

SANS

TOKEN

Watch Ads. Earn Crypto. Get Rewarded for Everything.

Official Whitepaper — Version 2.0 — June 2026

SANS Token is a Web3 utility token powering a dual-sided ecosystem: advertisers reach engaged audiences, and users earn SANS rewards by interacting with content inside our Telegram Mini App. A 10-stage presale starting at \$0.005 offers up to 10x returns at listing price of \$0.050.

01 — EXECUTIVE SUMMARY

Executive Summary

SANS Token (ticker: SANS) is a BEP-20 utility token on BNB Smart Chain. It powers the SANS ecosystem — a platform bridging Web2 advertising with Web3 user rewards. Advertisers fund reward pools; users earn SANS by watching ads, completing tasks, and referring friends through our Telegram Mini App.

The 10-stage presale starts at \$0.005 per SANS with a listing price of \$0.050 — giving Stage 1 buyers a potential 10x return. Every presale purchase in Stage 1 includes a 50% SANS bonus.

Metric	Value
Token Name	SANS Token
Ticker	SANS
Blockchain	BNB Smart Chain (BEP-20)
Total Supply	1,000,000,000 SANS
Stage 1 Price	\$0.005 per SANS
Listing Price	\$0.050 per SANS (10x)
Stage 1 Bonus	+50% SANS on every purchase
Presale Stages	10 stages (\$0.005 → \$0.023)

02 — PROBLEM STATEMENT

Problem Statement

The digital advertising industry generates over \$600 billion annually, yet end users — whose attention drives that value — receive nothing. Ad networks harvest user data and pocket the revenue.

Key pain points:

- Users receive zero compensation for their attention and data provided to advertisers.
- Ad fraud costs the industry \$100B+ per year with no on-chain verification.
- Centralised platforms have opaque fee structures and single points of failure.
- Crypto reward projects lack real advertiser demand or sustainable economics.

03 — THE SANS SOLUTION

The SANS Solution

SANS creates a transparent, on-chain marketplace where advertisers pay USDT/BNB to access verified, engaged audiences. Smart contracts automatically distribute SANS rewards to participating users.

Three pillars:

- **Earn:** Watch short ad clips or complete sponsor tasks in the Telegram Mini App to earn SANS every session.
- **Buy:** Join the 10-stage presale starting at \$0.005 — Stage 1 buyers get 50% bonus SANS and 10x potential at listing.
- **Refer:** Earn +10% SANS for every friend you bring. Top 10 referrers share \$100 USDT monthly.

04 — REWARD ECOSYSTEM

Reward Ecosystem

SANS features a multi-layered reward system designed to incentivise both early buyers and active community members.

Reward Type	Amount	Who Qualifies
Presale Stage 1 Bonus	+50% SANS	All Stage 1 buyers
Referral Bonus	+10% SANS per referral	Anyone with referral link
Monthly Top 10 Referrers	\$100 USDT shared	Top 10 referrers each month
P2E Ad Rewards	SANS per ad watched	All Mini App users
Task Completion	Bonus SANS	Quiz, like, retweet tasks

Example — Stage 1 buyer, 100 USDT:

Base SANS: 20,000 | +50% Bonus: 10,000 | Total: 30,000 SANS

At listing (\$0.050): $30,000 \times \$0.050 = \$1,500$ → 15x return on \$100 invested

05 — TELEGRAM MINI APP

Telegram Mini App

The SANS Mini App runs natively inside Telegram. Users connect a BSC wallet once for on-chain withdrawals; daily earning requires only a Telegram account.

User flow:

Step	Action	Reward
1	Open SANS Mini App via Telegram	—
2	Watch 15-30 second ad clip	SANS earned
3	Complete optional sponsor task	+Bonus SANS
4	Refer a friend via unique link	+10% of earnings
5	Reach weekly threshold — claim on-chain	Wallet transfer

Anti-abuse measures:

- Telegram account age verification.
- One ad view per campaign per user.
- Minimum balance required for on-chain claiming.
- IP-rate-limiting on ad delivery API.

06 — TOKENOMICS

Tokenomics

Fixed supply of 1,000,000,000 SANS. No mint function. Allocation designed for maximum liquidity and sustainable P2E rewards.

Allocation	Percentage	Amount (SANS)	Vesting
Presale (10 stages)	30%	300,000,000	Unlocked at TGE
Liquidity	25%	250,000,000	Locked 12 months (PinkSale)
P2E Rewards	20%	200,000,000	Released via smart contract
Marketing	15%	150,000,000	6-month linear vesting
Team	10%	100,000,000	12-month cliff, 24-month vest

Contract properties:

- No mint function — supply fixed at deployment.
- Ownership renounced after liquidity is added.
- 3% buy/sell tax: 1% buyback, 1% P2E pool, 1% marketing.
- Source code verified on BscScan.

07 — PRESALE DETAILS

10-Stage Presale

The presale runs across 10 stages with increasing prices. Earlier stages offer greater returns at listing. Stage 1 includes an exclusive 50% SANS bonus.

Stage	Price	Multiplier at Listing	Bonus	Hard Cap
1 (LIVE)	\$0.005	10x ■	+50% SANS	\$5,000
2	\$0.007	7.1x	-	\$10,000
3	\$0.009	5.6x	-	\$15,000
4	\$0.011	4.5x	-	\$20,000
5	\$0.013	3.8x	-	\$25,000
6	\$0.015	3.3x	-	\$30,000
7	\$0.017	2.9x	-	\$35,000
8	\$0.019	2.6x	-	\$40,000
9	\$0.021	2.4x	-	\$45,000
10	\$0.023	2.2x	-	\$50,000
Listing	\$0.050	—	—	—

Detail	Value
Min. Contribution	\$10 USDT
Max. Contribution	\$5,000 USDT
Accepted Currency	USDT (BEP-20)
Distribution	At TGE after presale close
Liquidity Lock	12 months via PinkSale

08 — DEFLATIONARY MECHANISM

Deflationary Buyback

1% of every SANS transaction is routed to the on-chain buyback treasury. Additionally, 10% of net advertiser revenue is sent to the same treasury. Monthly, the treasury buys SANS from PancakeSwap and burns it permanently.

Monthly Burn = (1% of all SANS tx volume) + (10% of monthly ad revenue)

As usage scales, both components grow — creating compounding deflationary pressure without relying on new buyer demand.

09 — ROADMAP

Roadmap

Phase	Title	Timeline	Key Milestones	Status
01	Foundation	Jun 2026	Smart contract, website, whitepaper, socials, audit (applying for)	Pre-App dev
02	Presale Launch	Jun-Aug 2026	10-stage presale, PinkSale lock, DEX listing \$0.050, CEX listing	Active
03	Ecosystem Growth	Sep-Nov 2026	P2E pools, advertiser onboarding, mobile beta, staking, \$1000000 pool	Upcoming
04	Scale	Dec 2026-Q1 2027	Multichain, DAO governance, Tier-1 CEX, buyback v2, Multi-chain	Upcoming

10 — TEAM & ADVISORS

Team & Advisors

The SANS core team combines blockchain development, digital advertising, and growth marketing experience. Full doxxing available to institutional partners on request.

Role	Background
Founder & CEO	Serial entrepreneur, 8 years in digital advertising tech
CTO	Solidity developer, previously audited 12 DeFi protocols
Head of Growth	Former Telegram channel operator (500K+ reach)
Marketing Lead	Web3 community builder, 3 successful IDO campaigns
Smart Contract Advisor	Certified by CertiK, contributor to BSC ecosystem

Team wallet (10%) subject to 12-month cliff + 24-month linear vesting enforced on-chain.
